

# Feedback Form

## Long-Term 2 RFP – July 4, 2024

### Feedback Provided by:

Name: Kyle Smyth

Title: Senior Engineering Manager, Facility Operations

Organization: Northland Power

Email: [REDACTED]

Date: 18-Jul-2024

To promote transparency, feedback submitted will be posted on the Long-Term RFP engagement page unless otherwise requested by the sender. If you wish to provide confidential feedback, please mark "Confidential".

Following the LT2 RFP July 4, 2024, engagement webinar, the Independent Electricity System Operator (IESO) is seeking feedback from stakeholders on the items discussed. The presentation and recording can be accessed from the LT RFP [engagement web page](#).

**Please submit feedback to [engagement@ieso.ca](mailto:engagement@ieso.ca) by July 19, 2024.**

## MT2 RFP

Topic	Feedback
Do you have any feedback regarding resource eligibility under the MT2 RFP?	Are off contract plants allowed to participate in MT2 in addition to those coming off contract?
Do you have any feedback regarding the IESO's proposed method of determining the procurement target for the MT2 RFP?	None.
Do you have any feedback regarding the contract structure or term length under the MT2 RFP?	None.
Do you have any feedback regarding capacity qualification for the MT2 RFP?	None.
Do you have any feedback regarding proposal submission fees and proposal security requirements for the MT2 RFP?	None.
Do you have any feedback to share regarding the IESO's proposed method of proposal evaluation under the MT2 RFP	None.

## LT2 RFP Capacity Stream

Topic	Feedback
Do you have any feedback to share regarding the capacity stream under the LT2 RFP?	Will book and claim be allowed for RNG or H2? Will blending with conventional gas be allowed? Are there requirements for emissions standards or environmental attributes around the production of biogas or hydrogen? Are there qualifiers around hydrogen production that suppliers must meet with respect to the emissions made during its production or amount of renewable energy used? Will the IESO change its stance and provide deliverability to the capacity stream prior to bid?

## LT2 RFP Proposal Evaluation

Topic	Feedback
Do you have any feedback to share regarding the IESO's proposed method of proposal evaluation under the LT2 RFP?	Northland would like to request that the IESO provide more details on how the deliverability testing will be done as part of the evaluation process for LT2.

## LT2 RFP Proposal Security

Topic	Feedback
Do you have any feedback to share regarding the proposal security requirements under the LT2 RFP?	Northland would like to request that the IESO clarify under what circumstances the proposal security would be refunded.

## General Comments/Feedback

Northland Power would like to thank the IESO for its continued engagement with stakeholders throughout the development of the MT2 and LT2 RFPs. As guidance has been provided with respect to project siting constraints, there remains a lack of clarity around pre-bid deliverability assessments as well as how the IESO plans to conduct the deliverability testing during the evaluation stage of the LT2 RFP.

Northland Power encourages the IESO to consider conducting detailed deliverability assessments pre-bid, as seen in other markets, to ensure significant development dollars are not wasted on infeasible projects. Further, conducting detailed deliverability assessments early in the procurement would focus the time, resources and capital of communities and indigenous stakeholders on feasible projects. In the event there are constraints on resources that are preventing the IESO from performing deliverability assessments early in the process, Northland Power would support the idea of outsourcing pre-bid deliverability assessments to third parties and passing these costs onto the developer.
