Long-Term 2 RFP – September 12, 2024

Feedback Provided by:

Name: Brad Kyte

Title: Senior Manager, Business Development

Organization: Atura Power

Email: [REDACTED]

Date: September 27, 2024

Following the LT2 RFP September 12, 2024, engagement webinar, the Independent Electricity System Operator (IESO) is seeking feedback from stakeholders on the items discussed. The presentation and recording can be accessed from the [Long-Term RFP \(ieso.ca\)](https://www.ieso.ca/Long-Term-RFP).

To promote transparency, feedback submitted will be posted on the Long-Term RFP engagement page unless otherwise requested by the sender. If you wish to provide confidential feedback, please mark “Yes” below:

- Yes – there is confidential information, do not post
- No – comfortable to publish to the IESO web page

Please submit feedback to engagement@ieso.ca by September 27, 2024.

LT2 RFP Deliverability Guidance – Update

Topic	Feedback
Do you have any feedback to share regarding the updated Preliminary Connection Guidance document?	Given the stated 'preliminary' nature of the Connection Guidance document, it would be helpful to understand what further steps IESO will be taking with respect to providing proponents with connection guidance and when this information would be available.
Do you have any feedback to share on the procedure to request access to the transmission system map or process to request pre-submission consultations?	
Do you have any feedback on the types of information that you would like to see in the LT2 Capacity RFP Guidance Document?	It would be helpful for the IESO to provide more specific information on transmission line thermal and short circuit capacity similar to the Transmission Availability Tables provided in prior procurements such as the Large Renewable Procurement. This level of information would be helpful in allowing Proponents to conduct more detailed transmission modelling diligence.

LT2 RFP Design – Policy Considerations

Topic	Feedback
Do you have any feedback to share on the policy considerations outlined in the August 29, 2024, letter from the Minister of Energy and Electrification to the IESO?	For the upcoming LT2 Capacity RFP, it is critical that the Effective Load Carrying Capability of each proposed project be considered in the evaluation process. This process should consider the duration of time the resource is capable of generating continuously and for storage resources, availability of sufficient energy to charge the resource based on round-trip efficiency.

Draft LT2 Energy RFP and Contract

Topic	Feedback
Do you have any feedback regarding the recently posted LT2(e) RFP?	

Topic	Feedback
Do you have any feedback regarding the recently posted second version of the LT2(e) Contract?	
Do you have any feedback to share on the proposed Rated Criteria for the LT2(e) RFP?	
Do you have any feedback to share on the proposed mandatory requirements for the LT2(e) RFP, including Municipal and Indigenous Support Resolutions requirements as well as requirements for siting projects on Crown Land?	
Do you have any feedback to share on the Indigenous and Community Engagement requirements for the LT2(e) RFP?	

Key Themes from Recent Stakeholder Feedback

Topic	Feedback
Do you have any feedback to share on the IESO responses to recent stakeholder feedback?
