Date: March 2, 2022

The Independent Electricity System Operator (IESO) is seeking feedback from participants on the draft Long-Term Request for Qualifications (LT1 RFQ). The LT 1 RFQ will seek to ensure that interested parties have the capability to undertake project development for the LT1 RFP and will seek to evaluate applicants both on corporate experience and employee experience.

The draft LT1 RFQ can be found on the [Long-Term RFP webpage](#).

Please provide feedback by March 31, 2022 to engagement@ieso.ca.

Please use subject header: *Draft Long-Term 1 RFQ*. To promote transparency, this feedback will be posted on the [Long-Term RFP webpage](#) unless otherwise requested by the sender.

The IESO will work to consider and incorporate comments as appropriate and post responses on the webpage.

Thank you for your contribution.

Draft LT 1 RFQ

Topic/ RFQ Section	Feedback
Qualification Submission Qualification Submission Fee / Section 2.7 (b)(i)	It is unclear whether the "Qualification Submission Fee" is refundable. REPD Canada would argue that a refundable submission fee structure will increase market participation.
Mandatory Requirements for Large-Scale LT1 Projects Large-Scale Entity Development Experience / Section 3.2 (a)(i)	
Mandatory Requirements for Large-Scale LT1 Projects Large-Scale Individual Development Experience / 3.2 (a)(ii)	
Mandatory Requirements for Large-Scale LT1 Projects Market Operating Experience / 3.2 (a)(iii)	
Mandatory Requirements for Small-Scale LT1 Projects Small-Scale Entity Development Experience / Section 3.2 (b)(i)	It is unclear whether Large-Scale participants are automatically qualified for Small-Scale participation.
Mandatory Requirements for Small-Scale LT1 Projects Small-Scale Individual Development Experience / 3.2 (b)(ii)	
Mandatory Requirements for Small-Scale LT1 Projects Market Operating Experience / 3.2 (b)(iii)	

General Comments/Feedback

REPD would recommend IESO to consider/design for a tier specific procurement with allocated capacities and curve-outs for the small scale projects/developers, necessary to provide a fair opportunity to all, promote large market participation, and transition to a distributed dynamic.
