Long-Term RFP – August 10, 2022

Feedback Provided by:

Name: Jud Whiteside

Title: Vice President

Organization: Aypa Power Canada ("Aypa")

Email: [REDACTED]

Date: Aug 22, 2022

Following the August 10th public webinar on the Long-Term RFP, the Independent Electricity System Operator (IESO) is seeking feedback from participants on: the LT1 RFP design and key updates presented in the meeting, Contract Design, Upgrades, and the Deliverability Test Guidance Document.

The referenced presentation can be found on the [Long-Term RFP webpage](#).

Please provide feedback by August 22, 2022 to engagement@ieso.ca.

Please use subject header: **Long-Term RFP**. To promote transparency, this feedback will be posted on the [Long-Term RFP webpage](#) unless otherwise requested by the sender.

The IESO will work to consider and incorporate comments as appropriate and post responses on the webpage.

Thank you for your contribution.

LT1 RFP Design and Key Updates

Topic	Feedback
<p>Please provide any general feedback on the LT1 RFP design and the key updates provided by IESO in the meeting.</p>	<p>Rated Criteria – Municipal Support</p> <p>The IESO introduced on Aug.10th the rated criteria points for the Municipal Support to be either max 6 points if Municipal Council Support Resolution is reached, or 0 points if not reached. No points to be awarded for evidence of the progress made. Given the upcoming municipal Fall elections and the new elected municipal council return to business activities coinciding with the Expedited Process RFP deadline, having newly elected council meet to vote for the resolution to align with the IESO expedited timeline could be challenging for proponents. Furthermore, pushing the present municipal councillors to support these projects could cause interference with the election activities.</p> <p>Aypa recommends a more reasonable rated criteria scale to recognize the progress being made towards Municipal Support, whereby points are awarded based on achieving critical milestones such as: projects presented to the municipal council, initial feedback received from the municipal council, voting date confirmed, etc.</p>

Proposed Contract Design

Topic	Feedback
<p>Please provide any feedback on the contract design and provisions proposed by the IESO.</p>	

Proposed Upgrades Process

Topic	Feedback
<p>Please provide any feedback on the proposed design and other considerations with respect to the Same Technology Upgrades procurement process.</p>	<p>Moving the Same Technology Expansions form the Same Tech to Expedited procurement</p> <p>The IESO announced on Aug.10th a change to move the Same Technology Expansions (new separately metered, registered, and operated generation units) from the Same Tech Procurement to the Expedited Process. This change will considerably erode the potential for awarding and building energy storage resources in Ontario under the Expedited process.</p> <p>Aypa recommends that the total MW target of the LT1 RFP procurement is rebalanced and that the Expedited Process procurement target is considerably increased due to this change. We encourage the IESO to give a clear indication to the development community on the total MW's IESO expects to be procured and the storage allocation.</p>

Deliverability Test Guidance Document

Topic	Feedback
<p>Please provide any feedback on the Deliverability Test Guidance Document and associated form.</p>	<p>Please find this as a request for clarification of the Deliverability Test Assumptions of the published Deliverability Guidance Document V2. In reference to the Sec.5.3, can the IESO please provide similar detailed values for Solar as was provided for Wind.</p>
