Hello,

At what stage would the IESO need to know about future supply needs for power, and the possible supply of electricity generation?

Temagami First Nation has future plans in developing a completely new community on the mainland off Bear Island. And we are presently doing a Feasibility Study on a possible 3.8-Megawatt Biomass CHP facility also on the mainland in the Town of Temagami area.

Both are in the beginning stages. Can you give us direction on what you would need and when you would need it.

Thank you,

Harri Makivirta

Community Energy Champion
