Proposed Dispatch Tool Change

Topic	Feedback
Do stakeholders foresee any challenges with the proposed dispatch tool change in terms of market participant implementability?	Capital Power appreciates the IESO's responsiveness to previous feedback provided by stakeholders. The changes proposed resolve a number of the previous issues identified. Capital Power has previously noted challenges presented by the proposed solution for facilities that may offer energy from duct burners. These challenges are unique to specific facilities, and accordingly Capital Power would appreciate further opportunities to discuss with IESO staff whether these challenges may be overcome in order to permit full participation in both energy and operating reserve markets.
From a stakeholder perspective, will the proposed design enable resources' to effectively respond to ORA dispatches?	No comments at this time.

Draft Market Rule Amendments for Unwarranted CMSC Claw-back

Draft Market Rule / Section	Feedback
Chapter 7, Sec. 7.4.6	Capital Power suggests striking the term "inappropriate" from the amendment, since this language is inconsistent with previous use of "unwarranted" to describe the CMSC to be clawed back and appears unnecessary for the application of the amendment.
