Proposed Dispatch Tool Change

Topic	Feedback
Do stakeholders foresee any challenges with the proposed dispatch tool change in terms of market participant implementability?	None
From a stakeholder perspective, will the proposed design enable resources' to effectively respond to ORA dispatches?	<p>H2O anticipates that the proposed design change will improve effectiveness for MP's to respond to ORA dispatches.</p> <p>However, the current EMI, Energy Submission Form allows MP's to submit up to 20 laminations. For MP's to increase their effectiveness to ORA dispatches, H2O recommends a design change to the OR Submission Form by increasing the laminations from 5 to 20. This will allow the MP's OR Offer/Bid structure to align with their corresponding Energy Offer/Bid structure.</p>
