**Subject:** New engagement: Ottawa Integrated Regional Resource Plan

The IESO has launched a [new engagement initiative](#) to seek input on the development of an Integrated Regional Resource Plan (IRRP) for the Ottawa Area sub-region. The IRRP, expected to be completed in Q3 2019, will assess the adequacy of the existing electricity infrastructure in the area and develop a set of recommended actions to maintain a reliable supply of electricity for the region over the next 20 years.

A webinar will be held on May 29 at 10:00 a.m. to provide an overview of this initiative and seek input on the proposed engagement plan and factors that may contribute to the region's electricity demand forecast and needs. The webinar presentation will be made available in advance and you can register [here](#) to participate.

All interested parties are invited to participate in this engagement initiative including, but not limited to, local municipalities, Indigenous communities, businesses, stakeholders and members of the general public.

All materials for this initiative, including the [draft engagement plan](#) are posted on the [IRRP – Ottawa Area Sub-Region engagement webpage](#).
