Summary

The IESO proposes to amend the market rules to explicitly allow the IESO to share confidential information in the form of a basecase directly to, or to a consultant of, a market participant, a connection applicant, or a person planning on constructing or modifying a facility for the purposes of completing reliability based power system studies.

In addition, it is proposed to eliminate the requirement for the IESO to advise every market participant affected by the disclosure of confidential information to an Ontario transmitter where such disclosure is required for transmitters to manage, operate and maintain their transmission system in a safe and reliable manner or for the reconciliation of applicable transmission service charges.

Background

Refer to MR-0426-Q00

Discussion

Chapter 3, section 5 provides the market rules and framework regarding confidential information. Section 5.3 lists exceptions and conditions where otherwise confidential information may be disclosed by market participants and/or the IESO.

Chapter 3Disclosure of Confidential Information for Reliability Based Power System Studies:Section 5.3.1.13 (new):

It is proposed to amend section 5.3 by adding to the list of exceptions to enable the IESO to disclose confidential information for the purposes of conducting reliability based power system studies, in the form of a basecase (defined below) of the IESO-controlled grid. Subject to the conditions of a required non-disclosure agreement (NDA) which is detailed in new section 5.3.10 below, the IESO will have the explicit ability to disclose confidential information directly to, or to a consultant of, a market participant, a connection applicant, or a person planning on constructing or modifying a facility, solely for the purposes of completing reliability based power system studies. This confidential information will be limited to electrical modeling information required for reliability based power system studies and the IESO will have sole discretion to validate the need for the disclosure of the confidential information.

Section 5.3.10 (new):

In order to ensure that the confidential information disclosed is kept confidential, section 5.3.10 will

PART 3 – EXPLANATION FOR PROPOSED AMENDMENT

obligate the IESO to enter into an NDA directly with, or with the consultant of, the market participant, connection applicant, or person planning to construct or modify a facility, as applicable. The NDA will:

- Establish a legally enforceable obligation to treat confidential information provided by the IESO as confidential, which will survive the completion of any reliability based power system study;
- Require that the confidential information is solely used for the purposes of completing the reliability based power system studies required by the IESO;
- Require the person to whom the disclosure is made, to destroy or return confidential information provided by the IESO at the conclusion of the reliability based power system studies, or five business days after request to destroy or return the confidential information is received.

Chapter 11 – New Defined Term:

It is also proposed to add the following new defined term in Chapter 11:

- “basecase” means a model of electrical components of the IESO-controlled grid and neighbouring electricity systems. Such components may include but are not limited to transformers, generation facilities, and transmission lines, and includes the steady-state, dynamic and short circuit attributes of each component where applicable.

Disclosure of Confidential Information to Transmitters:Section 5.3.5.1 (delete):

For purposes of section 5.3.1.8, it is proposed to allow the IESO to disclose confidential information to Ontario transmitters without notifying all affected market participants, confidential information in the form of:

- a “basecase” electrical model of the IESO-controlled grid; and
- transmission charge information, coincident peak and non-coincident peak data for applicable market participants.
