To promote transparency, feedback submitted will be posted on the [Greater Ottawa engagement webpage](#) unless otherwise requested by the sender.

Following the Greater Ottawa electricity planning engagement webinar held on June 9, 2025, the Independent Electricity System Operator (IESO) is seeking feedback on the detailed option analysis and draft recommendations. A copy of the presentation as well as a recording of the session can be accessed from the [engagement web page](#).

Please submit feedback to engagement@ieso.ca by June 30, 2025.

Topic	Feedback
What feedback do you have on the draft recommendations?	The recommendations appear to be appropriate. However, I have no background in these matters. When I read the report, the recommendations seemed to address the issues given the unknowns with respect to future demand and technology.
What information needs to be considered regarding the draft recommendations?	We will need solar/renewables. Might as well start planning ahead. When technology improves it should be fit into the mix.

Topic	Feedback
How can the IESO continue to engage with communities and stakeholders as the recommendations are implemented, or to help prepare for the next planning cycle?	Not sure. Whatever you did to get my attention seems to be effective.

General Comments/Feedback

I have limited understanding of the energy situation in the Ottawa area. When I read the report, it seemed to me that it addressed the inevitable increase in demand with doable/actionable suggestions using established technology. We'd all like to be 100% powered by renewables. We may have to wait a few years though.
