Subject: Bulk Electricity Planning in Northeast Ontario – April 26 Engagement Webinar

The IESO will host a public webinar on April 26 at 1:00 p.m. to provide an update and seek input on an electricity planning study in Northeast Ontario to address emerging needs being driven by strong economic growth and decarbonization initiatives. **Register [here](#) to participate in the webinar** where the IESO will seek feedback on key considerations for the scope, needs and potential solutions to meet the future electricity needs of Northeast Ontario.

Webinar materials will be posted on the [engagement webpage](#) in advance and written comments will be invited until May 17. More information can be found in the presentation from the July 27, 2021 public webinar, [Staying Connected: Bulk Electricity System Planning in Northeastern Ontario](#).

Bulk electricity planning takes up to a 20-year outlook and the process provides an opportunity for communities, stakeholders and interested parties to provide feedback about anticipated needs and priorities, and to contribute to the development of the options for meeting this area's future electricity needs.

All interested parties are invited and encouraged to participate including, but not limited to, local municipalities, Indigenous and Métis communities, businesses, stakeholders and members of the general public. For additional details on this engagement initiative, please visit the Northeast Ontario Bulk Planning [engagement webpage](#).

Thank you,

Rouselle Gratela
