Subject: Northwest Regional Electricity Planning Webinar - September 27

The IESO will host a public webinar on September 27 at 2:00 p.m. to engage on the further development of the long-term electricity plan – Integrated Regional Resource Plan (IRRP) – for the Northwest region. As a next step in the planning process, this webinar will provide an overview and seek feedback on the updated engagement plan, electricity demand forecast including mining growth scenarios, and preliminary areas of interest as identified in the technical studies to date.

To register for the September 27 webinar, please email engagement@ieso.ca. Webinar materials will be available in advance and written comments will be invited until October 18.

Visit the Northwest regional electricity planning engagement [webpage](#) for more information including the feedback received from the May 20 engagement session and the [IESO's response to feedback](#) which helped to inform the next steps of this planning work.

All interested parties are invited and encouraged to participate in regional planning including, but not limited to, local municipalities, Indigenous and Métis communities, businesses and industry, stakeholders and members of the general public.

Northwest Ontario includes the area roughly bounded by Lake Superior to the south, the Marathon area to the east, and the Manitoba border to the west. It includes the districts of Kenora, Rainy River and Thunder Bay. The Northwest is also home to many First Nation and Métis communities. Visit our website to learn more about the [Northwest region](#) or for more information about the [regional electricity planning process](#).

Thank you,

Susan Harrison
