What additional information should be considered as part of the Scoping Assessment?	Please see our input below in the comments

Topic	Feedback
What additional considerations, based on local developments, should be taken into account for the areas identified as requiring further study?	Please see our input below in the comments
What other areas or specific considerations should be examined through regional planning?	Please see our input below in the comments

General Comments/Feedback

KHSC currently operates two hospitals in Central Kingston; Kingston General Hospital and Hotel Dieu Hospital with a combined existing load of approximately 7MW. KHSC is currently working with the Ontario government to plan a new hospital in the Kingston region that is tentatively scheduled to be operational in the 2034-2043 Long Term Forecast timeframe. The estimated load of this new hospital is 11-12MW. Several sites are being contemplated for the new hospital including the Central Kingston and West Kingston area
