Date: 12/09/2025

To promote transparency, feedback submitted will be posted on the Peterborough to Kingston Electrical Region [engagement webpage](#) unless otherwise requested by the sender.

Following the Peterborough to Kingston electricity planning engagement webinar held on Thursday September 11, 2025, the Independent Electricity System Operator (IESO) is seeking feedback on the draft electricity demand forecast scenarios and the proposed engagement plan. A copy of the presentation as well as the recorded webinar can be accessed from the [engagement web page](#).

Local considerations and feedback are a critical component to the development of an Integrated Regional Resource Plan (IRRP). As this phase of the IRRP provides opportunity to determine the electricity demand forecast scenarios and the engagement strategy in the region the IESO wants to hear from you.

**Please submit feedback to** [engagement@ieso.ca](mailto:engagement@ieso.ca) **by October 2, 2025.**

Topic	Feedback
What additional information, if any, should be incorporated in the proposed scenarios?	I am not certain at this time.
How can the proposed scenarios best capture the range and uncertainty of growth potential while informing near-term infrastructure investments?	By looking at trends associated with the purchase of Electric Vehicles.
What areas of concern or interest about electricity should be considered as part of the planning process?	Ensuring that Secondary Distribution designs are taking potential base loads introduced by Electrical Vehicles into consideration when specifying conductors to be installed.
What information is important to provide throughout the engagement? Does the proposed Engagement Plan provide sufficient scope and opportunities for input? What other engagement activities or methods should be considered?	I think at this time the engagement is sufficient.

## General Comments/Feedback

Great presentation, good work!
