**Subject:** Electricity Planning in Renfrew Region – Webinar on July 26

The IESO will host a second public webinar on July 26 at 1:00 p.m. to provide an update on the development of an electricity plan – Integrated Regional Resource Plan (IRRP) – for the Renfrew Region. In this session, detailed electricity needs will be outlined and feedback will be invited on the potential options to meet the region’s future electricity needs.

[Register](#) to participate. All materials will be posted on the Renfrew region electricity planning engagement [web page](#) in advance of the session. Written feedback will be collected until August 16.

The [first public webinar](#) held on February 9 sought input on key local developments, projects, and initiatives to help inform the electricity demand forecast that determines how much electricity is needed in Renfrew Region over the next 20 years. As part of the IESO’s commitment to transparency and increased efforts around data sharing in its electricity planning activities, the detailed forecast providing a breakdown of electricity demand at the station level in the Renfrew Region has been [posted](#).

For additional details on this engagement initiative, presentation materials, recorded meetings, feedback received, and IESO responses, please visit the Renfrew Region electricity planning engagement [webpage](#).

Thank you,
