Date: July 27, 2026

To promote transparency, feedback submitted will be posted on the [Sudbury/Algoma engagement webpage](#) unless otherwise requested by the sender.

Following the Sudbury/Algoma electricity planning engagement webinar held on July 16, 2026, the Independent Electricity System Operator (IESO) is seeking your feedback on the draft electricity demand forecast scenarios and the proposed engagement plan. A copy of the presentation and the recording of the session can be accessed from the [engagement web page](#).

Please submit feedback to engagement@ieso.ca by July 31, 2026.

Topic	Feedback
What additional information, if any, should be incorporated in the proposed scenarios? How can the proposed scenarios best capture the range and uncertainty of growth potential while informing near-term infrastructure investments?	Health Sciences North (HSN) has submitted to the MOH a 20-year capital redevelopment plan. The proposed plan envisions expanding HSN's existing footprint by an estimated 50% in 10 years with the footprint potentially doubling in 20 years. This plan is not approved and remains in the early stages of review and discussion with the Ministry. HSN is also developing a decarbonization

Topic	Feedback
	plan that will in the long term reduce our reliance on natural gas.
What areas of concern or interest about electricity should be considered as part of the planning process?	System reliability is always a significant concern. As a critical care hospital, we must ensure appropriate redundancy are in place to maintain a continuous and reliable electrical supply to our hospital.
What information is important to provide throughout the engagement?	Important information would include any anticipated future constraints or limitations to the current grid capacity for Sudbury/ Algoma region particularly those that could affect large consumer such as HSN.
Does the proposed Engagement Plan provide sufficient scope and opportunities for input?	agree
