Subject: IESO Webinar | Local Achievable Potential Study
Date: August 5, 2025 3:18:39 PM

To further enhance and supplement the Toronto Integrated Regional Resource Plan (IRRP), the IESO is conducting a Local Achievable Potential Study (L-APS). The Toronto IRRP will look at Toronto's unique electricity needs, and considers wire and non-wire options and innovative resources to meet electricity needs. The results from the L-APS will be used to inform the Toronto IRRP's recommendations regarding using additional energy efficiency, load flexibility and customer-sited solar and storage programs to reduce or delay electricity needs.

On Thursday August 21 at 10:00 a.m., the IESO will host a webinar to share the draft L-APS findings for the Toronto electrical region, seek feedback and answer questions.

[Register to participate in the webinar.](#) Materials will be available in advance, and written comments will be welcome until September 11, 2025.

All interested parties are invited and encouraged to participate including, but not limited to, municipalities, Indigenous communities, businesses, stakeholders and members of the general public. Visit our [engagement webpage](#) to learn more about the Toronto region and the regional electricity planning process.

IESO Regional and Community Engagement

++This email is being sent to municipalities, IESO subscribers for the Toronto, and active participants in this engagement initiative. To subscribe for regional planning updates or manage your subscription, please visit <https://www.ieso.ca/subscribe>.
