Mr. Michael Lyle
Vice President, Legal Resources and Corporate Governance
Independent Electricity System Operator
120 Adelaide Street West, Suite 1600
Toronto, ON M5H 1T1

Dear Michael Lyle,

Re: **NERC Reliability Standard Glossary of Terms Revised Definitions for
“Generator Owner” and “Generator Operator”**

The Independent Electricity System Operator (IESO) posted revised definitions for “Generator Owner” and “Generator Operator” to the North American Electric Reliability Corporation (NERC) Reliability Standard Glossary of Terms on its public website on September 4, 2025. As you are aware, under section 36.2 of the *Electricity Act, 1998 (Act)*, the publication of a reliability standard, including an amendment to a reliability standard, approved by a standards authority establishes the timeline for certain activities. To provide greater transparency and certainty for the IESO, market participants, and other interested stakeholders, this letter is to confirm that:

- The Ontario Energy Board (OEB) has not received any application to undertake a review of the reliability standard under section 36.2(3) of the *Act*.
- The OEB, acting through the Chief Commissioner, has not commenced a review of this reliability standard under section 36.2(4) of the *Act*.

The OEB asks that the IESO post this letter at the appropriate place on the OEB Review Process webpage of the Reliability Standards Framework section of its website.

Yours truly,

Ritchie Murray
Acting Registrar
