

# Memorandum

To: Technical Panel  
From: Darren Byers  
Date: May 19, 2020  
Re: MR-00444: Reliability-Related Information

---

Attached for Technical Panel review and consideration is market rule amendment proposal MR-00444-R00.

The IESO is proposing to amend the market rules to remove appendices 4.5A to 4.9 in Chapter 4. Market participants are required to submit this information through Online IESO so the information tables in the appendices are no longer needed. The defined term “*reliability-related information*” includes these appendices, along with other references to these appendices, that will need to be modified or removed. Additional changes are proposed to Chapter 5 to clarify which reliability-related information is provided by the IESO versus the information that is provided to the IESO by market participants. These proposed amendments are not material as they do not change market participants’ obligations.

## **Panel Action and Next Steps**

The IESO recommends that the Technical Panel determine that the amendment submission warrants considerations as the changes meet the following criteria;

1. They identify errors within the market rules; and
2. They identify ambiguity or confusion within the market rules.

The IESO further recommends that the Technical Panel votes to post MR-00444-R00 for stakeholder review and comment for a period of two weeks, ending on June 12, 2020.

## **Recommendation – Priority**

The IESO recommends that the Technical Panel assign a regular priority to the development of the suggested changes.
