

# Memorandum

**To:** Technical Panel  
**From:** Darren Matsugu  
**Date:** February 8, 2022  
**Re:** MR-00468-R00 – Adjustments to Intertie Flow Limits

The IESO ensures the reliability of the province’s power system, balancing the supply of and demand for electricity on a second-by-second basis and directing its flow so it is available to Ontarians when and where they need it.

The IESO is proposing to add language to the market rules specifying when internal transmission constraints will be considered by the IESO in setting intertie flow limits.

## Stakeholder Notification

The IESO conducted an engagement webinar on November 22, 2021 identifying the issue and presenting the proposed market rule language. Three stakeholders provided written feedback, which the IESO posted responses to on January 12, 2022. Materials for this engagement can be found here: <https://www.ieso.ca/en/Sector-Participants/Engagement-Initiatives/Engagements/Adjustments-to-Intertie-Flow-Limits>

## Panel Action and Next Steps

The IESO recommends that the Technical Panel vote to post the proposed market rule amendment MR-00468-R00 for stakeholder review and comment for a period of two weeks, ending on March 3, 2022.
