Re: MR-00475-R00 – Replacement of the IESO Settlement System (RSS): New Implementation Date

The Replacement of the IESO Settlement System project is moving forward with a targeted implementation date of May 1, 2023.

To prepare for the May 1 implementation date, IESO staff have communicated the implementation to stakeholders, and had specific conversations with several market participants. Further details are outlined on the RSS [page](#).

Changes to the Market Rules

The proposed market rule amendments included with this item are the same as the previously recommended package of RSS market rules (MR-00472-R00) with a few exceptions. Those instances are highlighted in yellow in the attached MR-00475-R00 package, and described below for your reference:

MR-00472-R00 included the November 1, 2022 effective date multiple times within the rule language. IESO staff reviewed the inclusion of the date in the rule language and took a different approach within this package. Rather than include a specific date, the proposed market rule amendment includes a new definition, RSS commencement.

In response to Technical Panel feedback on MR-00472-R00, IESO staff clarified the language of sections 6.3.6 and 6.3.17 of Chapter 9.

The IESO also corrected cross section references in 6.3.17, 6.3.24, 6.6.1.4 and 6.7.1.3.

Panel Action and Next Steps

The IESO recommends that the Technical Panel vote to post the proposed market rule amendment MR-00475-R00 for stakeholder review and comment for a period of two weeks, ending on February 7, 2023.
