

Assessment of Impact of Market Rule Amendment on Consumers Re: Price, Reliability, Quality of Electricity Service

This form is used to document the *IESO's* assessment of the impact of a proposed *market rule amendment* on the interests of consumers with respect to prices and the *reliability* and quality of electricity service.

Terms and acronyms used in this Form that are italicized have the meanings ascribed thereto in Chapter 11 of the *Market Rules*.

Part 1 – Market Rule Information

Identification No.: MR-00482-R00

Title: 2024 Capacity Auction Market Rule Corrections

Date of Assessment: August 20, 2024

Part 2 – Assessment

The following is the *IESO's* assessment of the impact of the proposed *market rule amendment* on the interests of consumers with respect to price and the *reliability* and quality of electricity service.

Impact on Price:

The proposed market rule amendment will have no impact on energy market prices, however, the proposed changes may impact consumers as the Capacity Auction payments are recovered through the capacity auction uplift settlement amount. The amendments being proposed to the Capacity Auction Availability Charge are intended to clarify the application of this charge and ensure that Capacity Auction obligation holders are correctly charged when they fail to make their capacity available during the availability window. This will help to ensure that consumers are not paying for capacity that is unavailable.

Impact on Reliability of Electricity Service:

None

Impact on Quality of Electricity Service:

None
