

Floor Price Review

Contact Us

The IESO has completed a review of floor prices for variable generation, including additional research on the marginal cost of wind and solar manoeuvring and shutdown, as well as assessing the impact on market operations. The review comprised:

For more information on this stakeholder initiative, email [Stakeholder Engagement](mailto:stakeholderengagement@ieso.ca).

- Additional research on the marginal cost of variable generation manoeuvring. At the IESO's request, Navigant Consulting interviewed generators, equipment providers and other ISOs in order to ascertain the marginal cost of manoeuvring from multiple sources;
- IESO market analysis of changes to the current floor prices and associated dispatch order.

In the context of this stakeholder engagement, the IESO will share the results of this work and discuss with stakeholders the implications for current floor prices and dispatch order.

The IESO encourages all stakeholders in Ontario's electricity sector, or their representatives, with an interest in this matter to participate in this engagement. This initiative will be of particular interest to generators participating in the IESO-administered markets.

This stakeholder engagement plan may be subject to review and update as the process evolves and meaningful revisions are required to ensure that individuals have the opportunity to contribute their input on this initiative most efficiently.

All comments and enquiries in this stakeholder engagement can be directed to stakeholderengagement@ieso.ca.
